Liquidity, Alternative and Beta split

(at 30.12.11):

Liquid (lower volatility) assets (range 0%-20%)

These are assets that do not contain much credit risk, will not suffer huge volatility and can be easily disposed of to meet redemptions.

Cash		2.78%	2.78%
Government bonds			6.56%
	Treasury bills	4.55%	
	Index-Linked	2.01%	
High quality credit	(AA- or better)	0.00%	0.00%
			9.34%

Alternative assets (range 10%-50%)

Includes all those assets that demonstrate lower correlation in equity markets compared to beta assets, hence provide significant portfolio diversification. They can be divided into more liquid assets such as precious metals and less liquid assets, where the underlying asset remains less liquid even if the vehicle offers some liquidity such as bricks and mortar property.

David Coombs – Head of Multi Asset Investments, Fund Manager

David Coombs is head of multi asset investments at Rathbone Unit Trust Management, and joined Rathbones in April 2007. He is a member of the Strategic Asset Allocation Committee and the Collectives Research Committee.

He previously worked at Barings for 20 years where he established their absolute return investment process in the mid-90s. More recently he managed Barings range of multi asset funds. In addition he was responsible for a small number of segregated multi asset portfolios for institutional pension funds, charitable trusts, captive insurance companies and private clients based internationally. He joined Barings in 1988 from Hambros, where he managed multi asset portfolios for private clients. He is an Associate of the Chartered Institute of Bankers.

Investment objective

The fund seeks to achieve long term capital growth through investment in a mix of assets to the extent that each is permitted by the FSA regulations. The fund targets a return equal to 5% above UK CPI (Consumer Price Index) and a volatility rate equal to two thirds that of global equities as measured by the MSCI World Equity index.

Investment philosophy and style

The investment philosophy is to maintain clients' real value of capital over time unconstrained by index benchmarks but not invested in every asset class at all times. The asset allocation is by risk and correlation rather than purely geography and it is on a 'best of breed' approach. The whole of the investment fund and bond market is open for choice but with no exposure to direct equities and we are not restricted to buying from platforms.

The fund can include qualifying Exchange Traded Funds (ETFs), Investment Trusts, UCITS, onshore and offshore funds, single manager hedge funds, structured products, derivatives, sophisticated offshore UCITS III absolute return funds, gilts, commodities, property and cash. The fund will not contain in-house products, which reduces the conflicts of interest that might otherwise arise.

Further information

Copies of the Prospectus, Key Features and application forms may be obtained, free of charge, from Rathbone Unit Trust Management Limited.

The use of derivatives for investment purposes may increase the volatility of a sub-fund's net asset value and may increase its risk profile.

Emerging markets are volatile and may suffer from liquidity problems. Changes in rates of exchange between currencies may cause the value of investments to decrease or increase.

Details of tax levels and reliefs may change in the future. The value of any tax relief depends on individual circumstances. If you have doubts about your tax position, or the suitability of this investment, you should seek professional advice.

The Manager's annual fee is deducted from the fund's capital; as a result distributable income will be increased at the expense of capital which will either be eroded or future growth constrained.
